The Director
NASA Goddard University Programs

Dear Sir/Madam:

My name is Nwojo Nnanna Agwu; I am an associate professor of mathematics and computer science in the Department of Mathematics and Computer Science at Elizabeth City State University, Elizabeth City, North Carolina. I received my Ph.D. in mathematics from Texas Tech University in 1996.

Mr. Kaiem Frink has informed me that he is applying to NASA for a summer internship position and has requested a recommendation from me. Kaiem is majoring in computer science here at Elizabeth City State University, Elizabeth City, North Carolina. I am delighted to recommend him.

I have known Kaiem since August 2005 when he enrolled in my Computer Science II (CSc 215 Principles of Programming - C++) class. It did not take too long before I noticed him. This was as a result of his active participation in class by both asking and answering questions. He did class assignments promptly and was punctual to class. He made a high B in the course.

Kaiem is a hardworking student. Judging by his performances in class projects, I can vouch for his intellectual independence and originality of ideas. He possesses great ability of presenting his ideas lucidly and logically. In fact, I am very confident in his ability to successfully carry out a research work in computer science at NASA Goddard Center.

Kaiem is self-motivated, personable, conscientious, and very unassuming. He gets along very well with his fellow students and professors. His quantitative and analytical skills are above average. I have no doubt whatsoever in his abilities to successfully carry out a summer internship research project in computer science at NASA. He is a most suitable candidate for the program he is applying for. I strongly recommend Kaiem for the internship program at NASA.

To The Director
